With over 30 years of experience, IBA is an award winning aviation consultancy advising a broad mix of Lessors, Operators, Financiers and Investors. Operating globally, we advise clients and support operations across the aviation spectrum. Whether informing strategic investments, managing aircraft, advising on expansion or driving efficiency improvements, our mix of market analysis, proprietary data and technical expertise delivers value and mitigates risk across opportunities and challenges.

Aircraft valuation methodology

Values are taken from IBA's own helicopter values database. Information on transactions for various helicopter types is routinely gathered and stored in the database as part of IBA's daily business. The information is sorted and analysed for emerging trends in helicopter values and combined with IBA's views on the market to produce a depreciation profile. Whilst the techniques used and the judgments made do not isolate every single influence, it is IBA's view that the complexity of a purely mathematical approach would produce values that were overly sensitive to minor changes in the parameters feeding it. Consequently, IBA feels that, when making an assessment of helicopter values, there is no substitute, for the blend of market research and intelligence, mathematics, and judgement based on the experience of the appraiser in this dynamic market. The enclosed values are presented within a range to account for the age, utilisation and condition parameters of each helicopter type. Further, they are based on averages of baseline models.

Disclaimer

This price guide represents the opinion of IBA, and is intended to be advisory only. Therefore, IBA assumes no responsibility or legal liability for any action taken, or not taken by any party, with regard to the information provided. Information provided to IBA in confidence has been used to form the opinion expressed in this document. In order to protect this confidentiality, IBA regrets that it is unable to provide actual transactional data or to identify the sources for such data. The values herein do not in some cases (eg H225 / S92) fully reflect the lack of trades over the last year. If you require a specific valuation, please contact us for a quotation.
